NEW KYB SHOCK ABSORBER CATALOGUE FOR 2013

KYB has launched its latest shock absorber catalogue - a complete listing of the KYB range as well as details of all new applications for 2013.

The comprehensive catalogue features 139 new shock absorber part numbers for KYB's five ranges of shock absorbers and includes applications for cars, car derived vans (CDVs) and light commercial vehicles (LCVs). Many of the new parts are already available to order.

The new additions cover an impressive 6 million cars across Europe. Notable new applications include:

Audi A4	Fiat Linea (<i>Exclusive</i>)	Hyundai i30
Kia Ceed/ Proceed, Sorento		Nissan Qashqai+2
Opel Insigna	Peugeot 308	Renault Espace IV
Skoda Yeti	Toyota Landcruiser	

Also included are over 40 additional applications for Suspension Mounting Kits – which increase the life of the shock absorber and are easily replaced at the same time as the shock absorbers, as well as over 46 new Protection Kit applications.

80 Vehicle manufacturers are included in the KYB shock absorber catalogue, giving the largest aftermarket car parc coverage in Europe. For easy reference they are listed alphabetically. A helpful pictorial listing of suspension components is also included at the back of the catalogue.

The catalogue is available to download as a PDF from the KYB Europe website, as well as being listed on major electronic catalogues such as TecDoc.

KYB recommends that all shock absorbers are fitted in pairs, to restore the vehicles suspension performance and handling to how the vehicle manufacturer designed it.

NEW KYB COIL SPRING CATALOGUE FOR 2013

KYB has launched its brand new coil spring catalogue for 2013. The comprehensive catalogue features 73 new to range coil spring references, plus over 30 part numbers have been updated to cover additional applications.

KYB's 2013 coil spring range provides the best car parc coverage in the European aftermarket. The new additions cover an impressive 4.5 million cars across Europe. Notable new applications include:

Fiat Bravo II	Nissan Qashqai
Ford Fiesta	Peugeot Expert
Mazda 2	Seat Altea XL
Mercedes C Class	Skoda Octavia II

KYB is the only aftermarket supplier to offer a choice between both taper wire miniblock OE design and a constant wire alternative spring. Many other spring designs are also on offer including side load springs and a large range of heavy duty applications. KYB recommends that all coil springs are fitted in pairs, to maintain a balanced ride height on the vehicle.

Coil springs continue to be a strongly growing product range. Modern vehicles have more demands on them than ever before, requiring unusual spring designs, lower weight and higher stress, which in turn means a shorter working life for the coil spring.

The new coil spring catalogue is available to download as a PDF from the KYB Europe website, as well as being listed on major electronic catalogues such as TecDoc. The coil spring catalogue follows the same easy to use layout and design as the shock absorber catalogue.

Better known as a global leader in OE and aftermarket shock absorber manufacturing, KYB also supplies other suspension components including suspension mounting and protection kits. KYB is the world's largest supplier of shock absorbers to vehicle manufacturers, with more than one in four cars leaving production lines worldwide fitted with KYB as standard.
